

Inovation

# Challenges / Issues

---

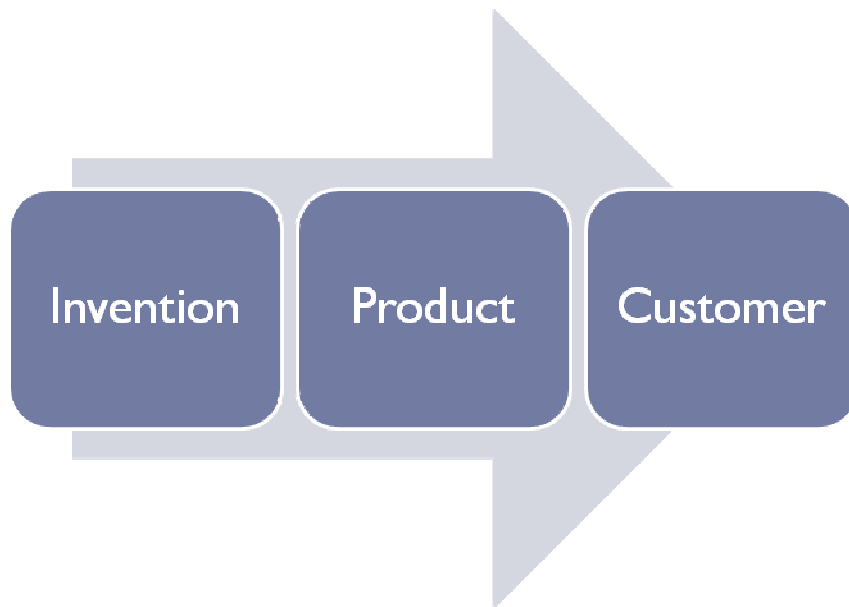

- ▶ Lack of BI players – natural leadership missing
  - ▶ High entry barriers (resources, IPR protection, regulation) and low risk sharing at the same time
  - ▶ Unpredictability of system(s)
  - ▶ Specific skills not developed enough or even missing
  - ▶ BI specificities not considered (rules, hard and soft infrastructure)
- 

# Proposals

---

- ▶ Innovation science / communication – „What can BI do for you?“
- ▶ Targeted public support / sharing risks (e.g. seed funds)
- ▶ Grants - revise rules to facilitate innovation and measure output
- ▶ Specific training programs
- ▶ Public support in getting top people from abroad
- ▶ Predictability, keeping promises
- ▶ Sense of urgency
- ▶ Identify goals, work together to achieve them!
